

The Three Gears To Ecommerce Growth

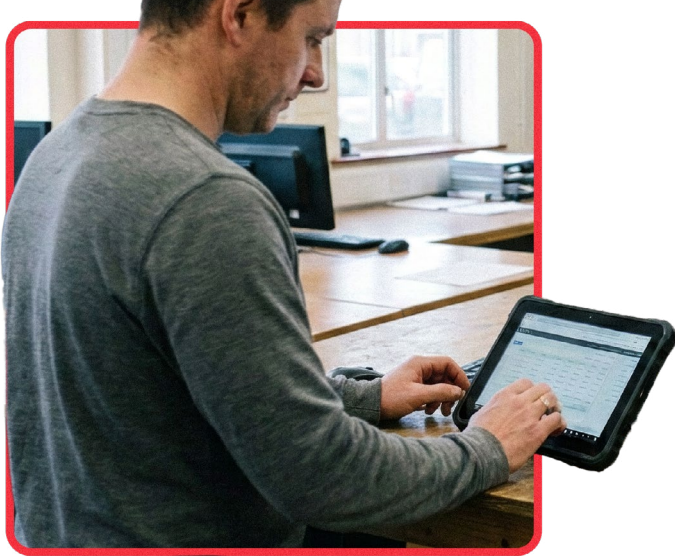

Turn your online store from a product catalog into a **proactive digital sales rep.**

 **Attract**

 **Convert**

 **Build**

Attract

Help new and existing buyers find your products online with increased visibility. **Stop waiting for traffic...go find it.** Attract prospective buyers to your website with:

AI SEO

Optimizes product titles and metadata so buyers find your store first in search.

Google Merchant Feed

Syncs your catalog with Google to put products in front of high-intent shoppers.

Listing enrichment

Uses AI to complete missing specs and images for a professional, searchable catalog.

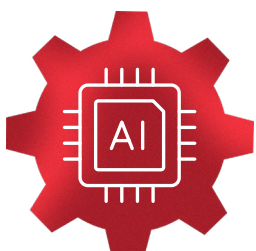

Embedded email

Launches newsletters and promos to bring existing customers back to your store.

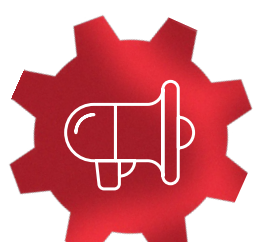

Convert

Make every visit count. **When finding and buying are effortless, browsers become buyers and orders grow.** Convert browsers with:

AI site search

Directs buyers to the correct product instantly by understanding B2B intent (part numbers, synonyms).

Personalized merchandising

Tailors banners and displays based on a buyer's profile and history.

Smart recommendations

Surfaces related items and upgrades automatically to increase every order's total value.

Cart recovery

Sends emails automatically to high-intent buyers who left items behind to capture otherwise lost sales.

Build

Turn one-time buyers into lifetime accounts. **Minimize friction and give customers a reason to stay with you.**

Build loyalty with your customers using:

Quick lists & reordering

Enables one-click favorites and reorders, eliminating manual calls and emails.

Recurring orders

Lets customers schedule routine restocks, protecting your long-term share of their wallet.

Loyalty rewards:

Incentivizes loyalty with points and tiered programs that give buyers a reason to stay.

24/7 self-service

Provides instant access to order history, invoices, and pricing without needing a rep.

Scale

When these three gears interlock, your ecommerce site does more than process transactions—it attracts buyers, grows order sizes, and drives repeat business.

The result: a proactive sales channel that protects margin and frees team to win bigger deals.
